

Problem solving in small animal internal medicine | “Medical Mystery Tour”

Donderdag 7 & vrijdag 8 december 2017
Anatomiegebouw - Utrecht

Course content

Using the medium of case discussions we will touch on many important elements of good medical practice – including developing a logical diagnostic approach, understanding diagnostic tests and improving case management.

Learning outcomes will include: developing a logical diagnostic approach to:

PU/PD	Weakness	Diarrhoea
Wheezing	Jaundice	Weight loss
Coughing and dyspnoea	Pale mucous membranes	Poorly controlled diabetic
Vomiting	Melaena	

Maximising the value of diagnostic testing

- Optimising the accuracy of diagnosing hyperadrenocorticism
- Interpreting serum calcium levels
- Diagnosis of dynamic airway disease
- Interpreting liver enzymes
- Interpretation of tests relating to pancreatitis
- Interpreting the haemogram
- Interpreting faecal tests
- Understanding the relationship between hyperthyroidism, hypertension and renal disease

Optimising clinical management

- Hyponatraemia
- Dynamic airway disease
- Hyperthyroidism
